

Veracruz

VERACRUZ CREAM

VERACRUZ CHAMPAGNE

The unique look of this stone displays in an exquisite way the texture of sea rocks.

The shape comes from the seashells and the organisms found at the bottom of the seas. Its name comes from the state of Veracruz in Mexico and is available in 3 light colors.

The image shows a close-up of a wall with a light gray, textured surface. The texture is composed of small, dark, irregular specks and fibers, giving it a stone-like or aggregate appearance. The wall is laid out in a brick pattern, with visible mortar lines forming a grid of rectangular blocks. The lighting is even, highlighting the granular details of the material.
